

Cash Access Products & Processing

Full Service ATMs
Credit Card Cash Advance
POS - Debit and Credit
Check Cashing Personal and Payroll
Cash Management

Selecting the right Cash Access partner is critical to the success of your property. As customers use more debit and credit, it is important to have products that will give your customers multiple options to access their cash. This goes directly to playable dollars, and if customers cannot access cash then they cannot play!

Multi-Choice Cash custom cash access product package includes, ATM, cash advance services, check-cashing services and service bureau. Within each product offering, Multi-Choice Cash provides an integrated solution including consultation, installation, training, call center support, dispute resolution, compliance monitoring, transaction processing, device management, private label services and total system upgrades. Our customers can purchase any of the services individually or as an integrated package.

Full service ATMs - Whether a stand alone ATM or tied to a multi-functional kiosk, Multi-Choice Cash server-based platform allows for easy installation and stand alone static IP address (does not interfere with casino IT operations). Multi-Choice Cash redundant support, backs up the central server, assures your property the time and ability to maintain seamless connectivity and uninterrupted transaction processing to your customers.

Credit Card Cash Advance and POS Debit and Credit:

Cage Terminal and Kiosk Credit Card

- Swipe, Scan and Print at the cage or pre-authorized at the ATM, Kiosk or floor terminal
- Minimal footprint in cage
- Customer activated touch screen terminals are easy, fast, secure and eliminates errors. Input fields are pre-populated with scanned or swiped data. Customers can go from request to cash in less than sixty-seconds.

The Cage terminal consists of the following components:

- PC, equipped with keyboard, monitor, and mouse
- Triple DES PIN pad
- Card reader
- MICR reader/scanner (optional)
- Scrip printer
